Decking Colour Options

# ABOUT US

Flexiteek has been creating beautifully engineered synthetic decking and marine products since 2000.

In 2024, our third generation product establishes a new standard in synthetic decking. It's made using a bio-attributed PVC with enhanced heat performance and all the usual leading benefits you've come to expect from Flexiteek.

## COLOUR COMBINATIONS

Over 15 colour combinations to choose from.

Create the decking look you want with one of our five colour options, including our new Ash shade, offering a lighter choice.

All our colours are available in up to three caulking options, traditional black, contemporary grey or modern white, to help you customise your new deck.

The original Flexiteek colour option still remains our biggest seller, and for a good reason. Its classic good looks remain popular worldwide.

**Please Note :** Flexiteek is designed to replicate the graining found on natural timber, therefore, this effect will differ between planks. This non-uniformity is intentional and an inherent feature of the product.

## SCRUBBED

Designed to mimic freshly scrubbed teak, this colour has a lovely warm tone with a deep variation.
